PROJECTS

WebEnv | webenv.simpledev.site | *React Native, JavaScript, C++*

May 2022 - Jan 2023

- Developed a full-stack and cross platform application with a React Native frontend for an IoT device monitoring environment data and serving it over a JSON API
- Used an ESP32 IoT device to monitor the data and send it to a webserver
- Fetched and visualized the data with a React Native app (available online as a web demo)
- Used Cloudflare to forward the data to a backend domain

TCTP.xyz (Tech Blog) | tctp.xyz | Gatsby, Tailwind CSS, React, JavaScript

Apr 2022 - Jan 2023

- Developed a responsive static Gatsby blog from scratch (no templates) with Netlify CMS and hosted on a Netlify backend
- Used Tailwind CSS for all styling which allowed a mobile-first design
- Integrated Netlify CMS to easily post blog posts with images, formatted text, etc.
- Hosted the entire blog on a free Netlify backend (with 90+ scores on Google Lighthouse)

ESPWeb | espdev.cloud | *C/C++, JavaScript, HTML, CSS*

Feb 2023 – Present

- · Hosted an entire responsive website on a NodeMCU microcontroller board with just 4MB of flash and 128KB of RAM
- Wrote the website using standard JavaScript/HTML/CSS and rendered some basic server information (uptime, memory usage, etc.)
- Wrote the backend HTTP webserver in standard C (with some C++) to run in the memory-constrained environment
- Sent the server information as a JSON API endpoint and received it using axios
